

Catalogue of Mental Health Measures

NEWS & UPDATES

Autumn 2024

What's new on the Catalogue?

New studies

- The **Genetic Links to Anxiety and Depression (GLAD) Study**: The world's largest ever study exploring the genetic and environmental risk factors of anxiety and depression, with participants from across the UK. 
- The **Education and Child Health Insights from Linked Data (ECHILD)** project: A project that links together health, education and social care information for all children in England. 

Accessibility & interoperability features

- Our **Search page** now includes accessible summaries of the Catalogue studies. These were co-created with the wonderful members of DATAMIND's Super Research Advisory Group.
- In each study page, we have integrated an **export feature to Harmony**, an online harmonisation tool, that enables users to check how comparable variables are across studies.

BLOGS

- By Elena on **DATAMIND from an early career researcher's point of view: The value of infrastructure and collaboration** 
- By Maria Jose and Hannah on **What can co-production teach us? Reflections from undergraduate psychology students** 

The launch of POPULATION RESEARCH UK

Population Research UK (PRUK) is a joint ESRC and MRC initiative that aims to maximise the use and benefits of UK longitudinal population studies across social, economic and biomedical sciences. PRUK will support the longitudinal research community, bringing together researchers, policymakers, study management teams and participants.

Free, in-person workshops are running across the UK between 22 October and 13 November 2024. [Register now & join the mailing list](#) to stay up to date!  

Team updates

We said goodbye to our lovely 2023-24 placement students Maria Jose and Hannah, and welcomed Jenny from University of Bath, who is completing her placement with us this year! We also welcomed back Daniel (a past placement student!) as a research assistant, as well as Bridget, Niamh and Frédéric, who are now post-doctoral fellows in the team. 

A photo of (most of) us wishing you a happy autumn!
